Employment

Software Project Manager   Jun 2021 - Present
Kirirom Institute of Technology
 I am currently working as a software project Manager for a certain company with the duty of integrating a whole new business management system for that company and its branches.

Before I able to get this opportunity, I have great achievement in that particular framework (Odoo) and I can be considered the best among my group which is why I was selected to oversee the development.

Odoo Engineer   Mar 2021 - Present
Freelancing
I have great experiences with Odoo. I can do fullstack with this business management system. I have experiences in customizing the web client, developing APIs, maintenance on the Database and setting up multiple processing for the system, and even setting up the server for development and production.

Web Development   May 2020 - Present
Freelancing
I have freelancing experiences in multiple project regarding web development. I have built many SEO friendly websites, integrated fast search and filtering engine in websites, developed many APIs and have successfully deployed the website for clients.
